

# CE Ready Speaker Series

BioDerm, Inc., in support of our Medline Urology partnership, is proud to offer a 2023 Speakers Series. Together with our clinical partners, we will **educate, implement, and impact** outcomes through Continuing Education-Ready Speaker Series on CAUTI risk and dislodgement risk.

Join experienced thought leaders and clinical champions as they share insights, guidelines, and evidence related to the risk of CAUTI and dislodgement. These sessions provide an opportunity to ask clinical questions, review the latest guidelines and published evidence, and get up-to-date information on medical devices.

Our professional-peer speaker program is focused on two clinical problems and the process to improve them. These 1-hour CE-ready educational sessions will provide you with the opportunity to collaborate with your peers on current protocols, the latest best practices, and new medical devices available to you.

Speakers can be scheduled in person or remotely with at least 45 days' notice through your BioDerm, Inc., Professional Education Contact. Call or email to set up your speaker series and obtain CE content.
